

HELP US BUILD A NEW BIKE REPAIR HUB!

Meet Sherri and Larry! They are our shipping containers in Dix Park that we're converting into a new community bike hub. This new shop space will be home to community shop hours, maintenance workshops, volunteer work sessions, bike repair clinics, and more.

We need \$8,050 to make this vision a reality:

- **Solar Fund - \$3,550** - Covers materials for solar power system. NCSolarNow is donating their time to design & install the system.
- **New Home Fund - \$2,500** - Covers workbenches, lighting, fans, storage, and more needed to turn these containers into a shop.
- **Tool Fund - \$1,000** - Covers shop repair stands, specialty tools, and additional portable mechanic tool sets.
- **Parts Fund - \$1,000** - Provides an initial stock of parts and supplies so we can start repairing bikes as soon as the shop opens.

It's not just a fundraiser. Sherri and Larry are in love! The campaign will culminate in a fun wedding ceremony on Saturday, Sep 26 at 4pm.

Help make their special day even more special by helping us reach our fundraising goal! Learn more about the project and donate to the new hub through their registry: theknot.com/sherriandlarry2026
